

Construction of new entrance way lobby, 500 space carpark and HGV turning circle

PROJECT TITLE	<b>Smartfleet solutions</b>
CLIENT	Smartfleet Solutions Ltd
ARCHITECT	Sammonds Architectural
CONTRACT VALUE	£800,000
DURATION OF WORKS	22 weeks
COMPLETION	December 2015
PROCUREMENT METHOD	Tender
CONTRACT NO.	1592

Melhuish and Saunders Ltd were contracted to build an new entranceway lobby to the Smartfleet Solutions facility. Along with this works were carried out to create an HGV turning circle and 500 space carpark to service the facility. Due to the concerns from The Environment Agency the proposal to use tarmac runways between the hardcore parking areas required us to produce a self draining runway system using cellweb and clean angular stone.

An additional storage facility was also built on site with access for large HGV's.
