

PROJECT TITLE	Smartfleet Solutions Ltd - 1592
CLIENT	Smartfleet Solutions Ltd
ARCHITECT	Sammonds Architectural
CONTRACT VALUE	£800,000
COMPLETION	2015

Smartfleet Solutions Ltd contracted us to develop a 500 space carpark, a HGV turning circle and to construct a new entranceway lobby into their facilities. This was a big project undertaken in phases,. Firstly starting with the clearing of the area and creating a storage compound, the next stage comprised of get the area prepared for, and constructing the lodge and the development of the parking spaces and all associated works. Due to the concerns from The Environment Agency the proposal to use tarmac runways between the hardcore parking areas required us to produce a self draining runway system using cellweb and clean angular stone.
